

ROCKS AND SOILS

- 
HAWKESBURY SANDSTONE
 Massive sandstone with thin interbedded layers of shale.
- 
GOSFORD FORMATIONS
 A mixture of soft sandstone layers with shales.... shales predominating.
- 
LATERITIC LOAM
 Pebbles of ironstone (which is concretionary) covering and mixed with sand/clay mix (a loam).
- 
PERCHED SAND DUNES
 Wind blown, sitting on the Gosford Formations and held in position by vegetation.
- 
ACCUMULATED SILT
 Boggy soil... SALINE MARSHES or BRACKISH.
