

# Estuarine Swamp Oak Forest

## Swamp Oak – Rushland Forest

**Unit E40**  
**REMS Unit 40**

### General Description:

Estuarine Swamp Oak Forest occurs adjacent to tidal estuaries in slightly higher ground than the nearby mangrove-related vegetation types. Swamp Oak (*Casuarina glauca*) clearly dominates this community, with an understorey of sedges and rushes such as *Juncus kraussii* subsp. *australiensis* and *Baumea juncea*, and the herb *Apium prostratum*.

### Known Floristic/ Structural Variations:

- (a) Type variant (mapped as E40i) – monospecific stands of Swamp Oak over *Baumea juncea* and *Juncus kraussii* subsp. *australiensis* forms the typical variant.
- (b) Rainforest ecotone variant (mapped as E40ii) – at the interface between saline and freshwater influences, an ecotonal zone exists where an overstorey of *Casuarina glauca* occurs over an understorey of sedges and rainforest species, such as *Glochidion ferdinandi*, *Ficus coronata*, *Livistona australis* etc. These areas can be quite distinct.

### Distribution:

*Within Gosford LGA* – generally occurs locally around coastal estuaries, but is also present in back swamps associated with major tributaries of the Hawkesbury River system.

*Within LHCC Region* – NPWS (2000) have mapped 2449ha of their Swamp Oak-Rushland Forest (Unit 40) remaining in the region.

#### Examples Within Gosford LGA

- Upper reaches of Avoca Lake (variant b)
- Floodplain of Erina Creek, south of Wells Road (variant c)

**Extent:**      **Extant - 355.44 ha**

### Relationship to Other Communities:

The clear dominance of *Casuarina glauca* separates this community from all others, although in some locations, understorey components are shared with Mangrove and Saltmarsh communities (Units E47 & E47a).

**Equivalent Vegetation Types:**

- Benson 1981 (Mangrove Creek): n/a
- Benson & Fallding 1981 (Brisbane Water) Reedland/ Rushland with *Casuarina glauca* (Unit 11)
- Benson 1986 (Gosf-Lake Mac): Low Open-Forest (Unit 4a)
- Clarke & Benson 1986 (Dharug): Forest – She-oak Swamp (Unit A3)
- Strom 1986 (Bouddi Peninsula): Woodland with Reedland/ Rushland (Unit 1.3.1)
- Clarke & Benson 1987 (Mt White/ Mt Olive): She-oak Swamp Forest (Unit A3)
- McRae 1990 (Bouddi Peninsula): n/a
- Binns 1996 (SF MFD): n/a
- Payne 1997 (Cockle Bay/ Bouddi): n/a
- Bell 1998 (Popran NP): Estuarine Swamp Oak Forest (Unit SF1)
- Bell 2002 (Wyong LGA): Estuarine Swamp Oak Forest (Unit 3)

**Significant Species:**

- Undescribed species – *none recorded*
- Threatened (TSC Act) – *none recorded*
- Rare (ROTAP) – *none recorded*

**Community Conservation Status:**

*Reserve Representation* - within Gosford, small areas of this vegetation type are present in Cockle Bay NR, together with several of the island reserves in Brisbane Water.

*TSC Act (1995) Status* - not currently listed.

**Mapping Reliability & Included Units:**

*High Resolution Area* - this vegetation type has been mapped through aerial photographic interpretation and ground truthing.

*Low Resolution Area* - as modelled by LHCCREMS, with some limited ground truthing.

**Vegetation Structure:**

Stratum	Mean height (m)	Min height (m)	Max height (m)	Mean cover (%)	Sdev	n
Emergent						
Tallest	12.13	4.00	18.00	41	21.4	4
Middle 1	6.50	5.00	8.00	80		1
Middle 2	0.55	0.10	1.00	90		1
Middle 3						
Lowest	0.85	0.10	2.00	69	22.9	4

**Key Diagnostic Species [based on 7 plots]:**

Life Form	Species	Community		All others		Fidelity
		c/a	Freq.	c/a	Freq.	
Tree	<i>Casuarina glauca</i>			4	100%	positive
	<i>Melaleuca quinquenervia</i>			5	14%	uninformative
Small tree	<i>Melaleuca styphelioides</i>			1	43%	uninformative
	<i>Melaleuca linariifolia</i>			2	29%	uninformative
Shrub	<i>Melaleuca ericifolia</i>			2	43%	positive
	<i>Avicennia marina</i> subsp. <i>australisica</i>			2	14%	uninformative
